Professional Summary

Cloud and GenAI Engineer with hands-on experience architecting autonomous agent workflows, distributed microservices, and high-throughput data pipelines across AWS and GCP. I am a frontier engineer Proficient in engineering Model Context Protocol (MCP) servers, tool-calling LLM integrations, and containerized backend architectures using Python, FastMCP, and Docker. Strong foundation in Data Structures, Algorithms, and Cloud Systems Reliability.

Technical Skills

- GenAI & LLMs** : Model Context Protocol (MCP), FastMCP, Tool Calling, Anthropic Claude API, Agentic Workflows
- Cloud & DevOps** : Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Cloud Run, EC2, S3, Lambda, BigQuery
- Languages & Frameworks** : Python, Java, JavaScript (ES6+), SQL, FastAPI, Node.js, Express.js, Flask, React.js
- Databases & Storage** : MongoDB, MySQL, Redis, DynamoDB, Vector Embeddings / Document Stores
- Core Competencies** : Distributed Systems, RESTful APIs, Data Structures & Algorithms (DSA), CI/CD, Cloud Incident Triage

Work Experience

- Turing IQ**
AI & Cloud Software Engineer Intern

May 2026 – Present
Remote

 - Architected scalable marketing telemetry ingestion pipelines on **GCP** leveraging **BigQuery** and **Airflow**, streaming real-time metrics across TikTok, Facebook, Apple Search, and Reddit APIs.
 - Refactored legacy data ingestion endpoints to resolve schema drifts, elevating telemetry pipeline uptime to **99.5%**.
 - Built an event-driven incident response automation system using cloud webhooks and LLM log summarization, slashing manual on-call triage overhead by **80%**.
 - Developed and deployed production-grade **MCP servers** enabling autonomous agents to interface directly with internal product APIs and telemetry datasets.
- Cothon Solutions**
Software & UI Engineering Intern

Aug 2025 – Sep 2025
Remote

 - Designed high-fidelity component architectures in **Figma** and implemented modular, reusable frontend interfaces for client-facing analytics portals.
 - Optimized user flows and end-to-end telemetry interaction patterns, increasing navigation efficiency and interface responsiveness across multi-device breakpoints.

Technical Projects

- AWS Hybrid Model Context Protocol (MCP) Server**
[GitHub Source Code](#)

Python, FastMCP, boto3, Docker, GCP Cloud Run, AWS Labs

 - Architected a hybrid **MCP server** enabling Claude and frontier LLMs to execute natural-language diagnostics and state inspection across multi-service AWS infrastructure.
 - Implemented 54 programmatic tools covering EC2, S3, Lambda, and RDS using **FastMCP** and **boto3**; bridged 6 official AWS Labs MCP servers via an async multiplexing proxy.
 - Engineered autonomous agent playbooks for cost leak detection, S3 security audits, and real-time CloudWatch incident analysis; containerized via **Docker** for **Cloud Run**.
- High-Throughput E-Commerce Platform & Microservice API**
[GitHub Source Code](#)

Python, Flask, React.js, REST APIs, JSON Architecture

 - Engineered a decoupled, multi-tier web application combining a reactive **React.js** frontend with a stateless, high-throughput **Flask** REST API.
 - Implemented dynamic multi-parameter catalog filtering, transactional state handling, and asynchronous client-server synchronization layers.
 - Structured optimized JSON serialization pipelines and defensive validation routines to minimize payload latency across client-server boundaries.

Education

- VIT-AP University**
B.Tech in Computer Science and Engineering — CGPA: 8.83

2023 – 2027
Amaravati, AP, India
- Bhashyam Junior College**
Board of Intermediate Education AP (MPC) — CGPA: 9.19

2021 – 2023
Guntur, AP, India
- Kennedy High School**
Secondary School Certificate (SSC) — CGPA: 9.30

2016 – 2021
Guntur, AP, India

Certifications & Achievements

- AWS Certified Cloud Practitioner** — Amazon Web Services (Core Cloud Architecture, Security, IAM & Compute)
- Full Stack Development with MERN** — Blackbucks
- Winner**, Design-a-thon (Next-Nexus, VIT-AP) — 1st Place for architectural interface modeling in Figma.
